

FUTURE LAB

REINVENTING LEADERSHIP

FOR THE AGE OF INTELLIGENT MACHINES

May 23rd and 24th 2019 | Munich

IMAGINE A WORLD IN WHICH EVERYTHING THAT CAN BE AUTOMATED, IS AUTOMATED...

Not far from now, robots will execute many jobs that are human labor today and intelligent algorithms will affect decision making at many levels. These changes will fundamentally change the nature, practice and challenges of leadership:

- *How will organizations look like in the age of AI and robotics?*
- *What is the role of leadership in hybrid human-machine ecosystems?*
- *What competences are key for future leaders?*
- *How will the digital transformation affect the fundamental beliefs of our current economic system, such as traditional career paths, corporate hierarchies, and monetary incentives?*

Leaders of all industries have to take action today to prepare for the world of tomorrow.

WHAT IS THE FUTURE LAB?

The Future Lab is a **1.5-day think tank**, in which business executives, digital natives, entrepreneurs and researchers join forces to anticipate how **leadership will change** with the rise of artificial intelligence and robotics. We will **develop a joint vision** for current and future leaders to prepare themselves, their teams and their entire organization for the transition to come.

WHO SHOULD PARTICIPATE?

- **Business executives** who are curious to think ahead
- **Digital transformation experts** looking to exchange with peers
- **HR practitioners** with a focus on learning and leadership development
- **Entrepreneurs** and **innovators** who are eager to shape our future economy
- **Researchers** and **highly-talented students** of all disciplines

WHY SHOULD YOU PARTICIPATE?

The Future Lab combines **inspirational sessions** and insights from **global thought leaders** with **co-creative activities** to harness the full potential of a diverse group of participants

As participant, you will

- **learn** about different scenarios how the rise of artificial intelligence will disrupt the future of work;
- **think ahead** what leadership means in 20 years;
- **transfer your new insights** to co-create a vision of leadership in the digital era;
- exchange with people from different backgrounds to **challenge your own perspective**, such as industry experts, entrepreneurs, researchers, or digital natives;
- **develop your personal leadership roadmap** for the AI age.

FUTURE LAB AGENDA

- STEP 1 FUTURE SAFARI**
 Explore future scenarios about working in the AI age based on insights from over 50 experts and thought leaders. Derive the biggest challenges for leadership.
- STEP 2 PIONEER TALKS**
 Discuss your ideas with leadership and AI experts during and inspirational evening.
- STEP 3 LEADERSHIP VISION**
 Develop the leadership profile of the future. Discuss how the nature and practice of leadership will change in the next decades and which competences will matter most the digital era.
- STEP 4 LEADER'S GUIDE TO THE AI AGE**
 Co-create a roadmap to master the transition to come: What concrete actions are required? How can I equip myself, my teams and my organization for the upcoming challenges?

YOUR MODERATORS

LAURA BECHTHOLD
Executive Director of the Future of Leadership Initiative

SEBASTIAN MORGNER
Co-founder of the Future of Leadership Initiative

- 12:30 **Lunch**
- 13:30 **A Leader's Guide to the AI Age**
Develop an action plan for current and future leaders to thrive in the age of intelligent machines.
- 16:00 **Presentation and Discussion of Results**
- 17:00 **Closing and Reflection**
- 17:30 **Reception**

ABOUT US

Each year, the FLI community tackles a pressing question of leadership. We bring together a unique blend of people across industries, academic disciplines, and generations in various co-creation sessions. Further, a group of researchers is conducting in-depth interviews with global thought leaders to learn from their experiences and insights.

With your participation at the Future Lab, you contribute to the 2019 Grand Challenges activities on: **“Yes, Mr. Robot! – Leadership and the Rise of Intelligent Machines”**.
